

**#3**

### **PART I — CONTACT INFO**

Title of your Idea/Project/Program: **Kapaolono Restoration**  
Your Name: **Bartlett Durand**  
Group (if you're part of an organized entity): **HULA**  
Mailing Address: **2362 Liloa Rise, Honolulu, HI 96822**  
Phone: **946-8733; cell 372-9345**  
E-mail: **bartlett\_durand@hotmail.com**

### **PART II - DESCRIPTION**

What is your idea, project or program? **To restore Kapaolono fields to a safe, playable area.**  
What sparked the idea for your proposal? **The fields are a mess.**

How does your idea/proposal fill an unmet need in Ultimate, other disc related activities and/or the broader community?

**I believe the fields we play on are unsafe. The Parks and Recreation Division does not have the resources (financial or personnel) to repair these fields on their own. It would not only protect our players, make playing more enjoyable, but be a good service to the community.**

### **PART III — DETAILS**

How feasible is your project, i.e. what is the likelihood of you completing this project — with or without a ALOHA Grant?

**Without a grant, it will not be feasible (unless I can get individuals to kick in money). With, it is extremely feasible - we just need bodies to show up and to rent equipment.**

When will the project happen? When will it be completed?

**Target date - Mid-December (I have asked league commissioners to move up finals one week). Fields will be closed through January.**

Who is the "project sponsor", or primary person responsible?

**Myself, working with Parks and Rec Regional Director Tony Robinson.**

Who else is involved (if it is a group)?

**All the volunteers I can gather.**

### **PART IV — RESOURCES**

What resources are needed for the project completion? List all resources necessary including facilities, people, money, equipment, etc.....

**I propose buying a water coupler so we can tap into the park's water system, sprinkler, hose (all for manual watering); renting hand tools as necessary for the project day; buying field turf to use as grass plugs; lots of people as volunteers. City will aerate, provide training, possibly provide some turf (though highly uncertain), probably provide grass seed and fertilizer.**

Of these resources, which do you already have secured? Which do you foresee as being difficult to obtain?

**I have quotes for the sprinkler system (~\$100) and turf (\$18 per 2x4 patch); I am assuming rental will be less than \$100.**

What is the amount of your ALOHA Grant request? **\$500**

How will this amount be used? **First for sprinkler, second for tools as necessary, all remainder for turf/seed/fertilizer for most effect (working with City to see what they can provide)**

## **PART V — CONCLUSION**

Please write a short SUMMARY for the web page.

**This project is designed to work in conjunction with the City and County of Honolulu, Parks and Recreation to rehabilitate the state of the Kapaolono Fields. With the Aloha Grant, we will purchase a water tapper and manual sprinkler system which will allow us to regularly water the fields that are not now watered. We will also be purchasing field turf to use as plugs and carpet to cover the dirt patches now prevalent in the fields. We will rent small hand tools to plant these plugs and fill in holes with dirt (also provided by the City). The City has agreed to close the park for two months and to fertilize/water regularly so the grass can fully take hold. Target date: mid-December through the end of January.**

Please give us a BRIEF ultimate "resume": What ultimate experience(s) are relevant to the nature of your project? What ultimate projects have you undertaken and/or what leadership roles have you held, if any? You may also include relevant non-ultimate activities.

**Lawyer, Philosopher, Leader of Us All, Bartlett Durand has championed many a dream and turned it into reality. Unfortunately, he has no experience, outside of mowing the grass, with field rehabilitation.**
